FOREWORD

Realizing the importance of agricultural statistics in the understanding of rural conditions and problems and in formulating agricultural policies and programs, concerned government agencies in Taiwan has well kept agricultural statistics that can readily be traced back to the beginning of this century. The rapid expansion of Taiwan's agriculture in recent decades has been due partly to the continuous compilation and analysis of historical and current agricultural statistics.

These statistics have been presented to the public on yearly basis in the form of Taiwan Agricultural Yearbooks published by the Provincial Department of Agriculture and Forestry and its predecessors. Except a few editions of recent years, these Yearbooks were either in Japanese or Chinese. The aim of this publication is to present in English the basic agricultural statistics of Taiwan for the period of 1901-1955 in a single compact bulletin and in a manner in which they may be most easily understood.

To show the changes from year to year, the tables of Part I through Part IV are charted and the charts are placed next to the corresponding tables for easy reference. Distributions of crop and livestock production by prefecture and by city are also illustrated in maps that appear in Part V. Together with other JCRR reports, it is hoped that this publication will be of some help to those who are interested in studying the agricultural production and development of Taiwan.

This bulletin was prepared first under the direction of Mr. Clark C. Milligan, formerly JCRR Advisor on Agricultural Reporting, and later of Dr. S. C. Hsieh and Mr. Edward H. Chang, Chief and Crop Reporting Specialist respectively of Rural Economics Division, JCRR. Special credit for compiling data and translation is due Messrs. I. G. Chen and C. S. Chen, Statistical Assistants of the Division.

Y. C. Tsui
Acting Chief
Rural Economics Division
JCRR

Taiwan Agricultural Statistics, 1901-1955

I. Introduction

Preparation of this report was under the direction of Mr. Clark C. Milligan, former Advisor to the JCRR on agriculture reporting. Messrs. I. G. Chen and C. S. Chen, Statistical Assistants in the Rural Economics Division, JCRR, were responsible for the recording of data from Chinese Sources and mathematical computation. After Mr. Milligan's departure, the materials compiled were reviewed by Dr. S. C. Hsieh, Chief, and Mr. Edward H. Chang, Specialist, of Rural Economics Division.

II. Purpose

This publication is an attempt to fill a need for a concise English translation of basic agricultural statistics of Taiwan. The period covered by this report and the manner of presentation are intended to facilitate analysis of production trends and together with other JCRR reports, it should be helpful in studying the factors influencing agricultural production in Taiwan.

III. Presentation of Data

All statistical data in this book prior to 1937 are from "50 Years of Statistical Data of Taiwan", published by the Statistical Section of the Office of Taiwan Chief Executive, 1946. Data from 1937-55 are from PDAF Agricultural Yearbooks. Caloric values of different crops are quoted in the first part of this report for easier references, from the following publications: Food Composition Tables, Food and Agriculture Organization of the United Nations, 1953, Composition of Foods in Far Eastern Countries, United States Department of Agriculture, March, 1952. The international metric system of measurement is used to express units of area yield and production.

The book "50 Years of Statistical Data of Taiwan" presents only area and production data for crops. Consequently it was necessary to compute crop yields for years prior to 1937 by dividing crop production by crop area.

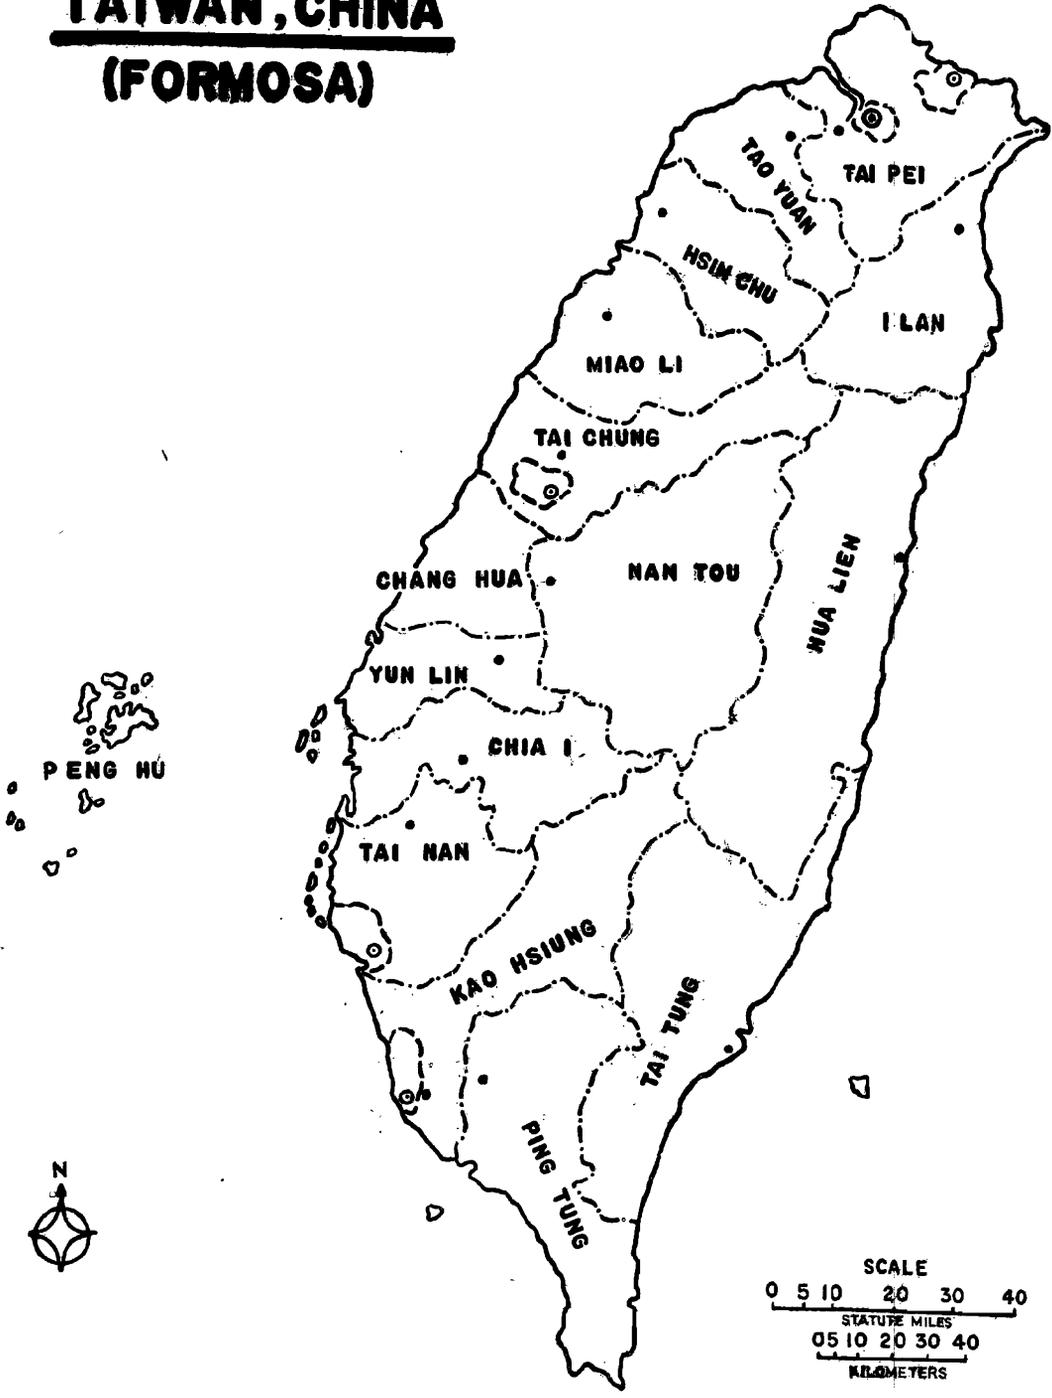

Data for 1937 and thereafter were secured from and are recorded as shown in the Yearbooks with the exception that decimal fractions of 5 or more were

added as integral numbers while those of less than 5 were dropped. Periods without statistics are indicated with ND (no data) while years in which no planting occurred are indicated as “—”. A zero (0) shall be interpreted as less than one half of the designated unit. Ten year averages (AVG) were secured by totalling the area or production (numbers in the case of livestock) and dividing by ten. Average crop yield figures were secured by dividing the total production, by the total area.

The term “Taiwan” in this book includes Formosa, Pescadores and other small adjacent islands. Prior to 1950, the province of Taiwan contained 8 prefectures, or hsien, and 9 cities. Today, it is divided into 16 prefectures, or hsien, 5 cities and 1 administration area. Consequently it is difficult to compare the crop production statistics by hsien prior to 1950 with those under the present administration. For this reason Part V, “Crop and Livestock Production by Hsien and City” starts with the year 1950.

Crops having areas of less than 10 hectares are grouped except in the case of buckwheat which is the only grain crop having such a small area. To partially identify grouped crops, the specific names, when known, are footnoted in the order of area planted. Crops are listed in the order of area planted within their respective groups.

TAIWAN, CHINA (FORMOSA)

FREQUENTLY USED CONVERSION FACTORS

A. Rice Weights:

Paddy rice* = 0.76336 Brown rice
 Ponlai paddy rice = 0.686 Ponlai polished rice
 Chailai paddy rice = 0.670 Chailai polished rice
 Ponlai paddy rice = 0.762 Brown rice
 Chailai paddy rice = 0.744 Brown rice
 Ponlai brown rice = 0.93** Polished rice } (Domestic)
 Chailai brown rice = 0.94** Polished rice }
 Ponlai brown rice = 0.91 Polished rice } (Export)
 Chailai brown rice = 0.92 Polished rice }

* Standard conversion

** Official milling rate from brown to polished rice for domestic markets

B. Weight:

1 Catty (Taiwan) = 1.31575 Pounds
 1 Pound = 0.76002 Catties (Taiwan)
 1 Catty (Taiwan) = 0.59682 Kilograms
 1 Kilogram = 1.67556 Catties (Taiwan)
 1 Pound = 0.45359 Kilograms
 1 Kilogram = 2.20462 Pounds
 1 Catty (M. Chinese) = 1.10231 Pounds
 1 Pound = 0.90719 Catties (M. Chinese)
 1 Catty (M. Chinese) = 0.5000 Kilograms
 1 Catty (M. Chinese) = 0.83778 Catties (Taiwan)
 1 Catty (Taiwan) = 1.19362 Catties (M. Chinese)

C. Area:

1 Chia = 0.96992 Hectares
 1 Hectare = 1.03102 Chias
 1 Chia = 2.39680 Acres
 1 Acre = 0.40467 Hectares

1 Acre = 0.41722 Chias
 1 Hectare = 2.47114 Acres
 1 Square Kilometer = 0.3961 Square miles
 1 Square mile = 2.5900 Square Kilometers
 1 Square Kilometer = 100,000 Hectares

D. Conversion Indexes or Rates Per Unit Area

1 Pound per acre = 0.00112 Metric tons per hectare
 1 Pound per acre = 1.12089 Kilograms per hectare
 1 Pound per acre = 1.82162 Catties (Taiwan) per chia
 1 Pound per acre = 1.08717 Kilograms per chia
 1 Metric ton per hectare = 892.14694 Pounds per acre
 1 Kilogram per hectare = 0.89215 Pounds per acre
 1 Catty (Taiwan) = 0.548961 Pounds per acre
 1 Kilogram per chia = 0.91982 Pounds per acre
 1 Kilogram per chia = 0.96992 Kilograms per hectare
 1 Catty (Taiwan) per chia = 0.61533 Kilograms per hectare

E. Volume:

1 Gallon = 3.78543 Liters
 1 Liter = 0.26427 Gallons
 1 Cu Foot = 0.0283 Cu Meters
 1 Cu Meter = 35.3357 Cu Feet
 1 Cu Yard = 0.7646 Cu Meters
 1 Cu Meter = 1.30787 Cu Yards

F. Length:

1 Kilometer = 0.62137 Miles
 1 Mile = 1.60935 Kilometers
 1 Millimeter = 0.03937 Inches
 1 Inch = 25.40005 Millimeters
