

圖一、蔓澤蘭和小花蔓澤蘭營養生長之比較。

Fig. 1. Length of vine (a), dry weight (b), leaf number(c), and leaf area(d) of *Mikania cordata* and *M. micrantha* by vertical bar indicates standard error of the associated mean value. Factors were separate investigated in green house. Each data point and the associated standard error derived from data on five replicates of testing unit. Both Mikania were raised in green house under similar conditions during May to August, 2002.
