

圖一、試驗田樣區設置。紅色框為乾濕交替節水灌溉樣田（AWD），綠色框為對照組漫灌樣田（CI），編號為樣田重覆數與標示相對位置，藍色箭頭指示水流方向

Fig. 1. Design and distribution of sampling sites: red frames were experimental fields of alternate wetting and drying water-saving irrigation (AWD) and green frames were control fields of conventional irrigation (CI) which keeps an inundated status in majority. Blue arrow indicates the water movement direction. Ranked number behind the abbreviation indicate the position of every replicated fields.
