

Figure 1 shows a schematic diagram of a rectangular domain with a central square hole. The domain is divided into four quadrants by a vertical line at $x=0$ and a horizontal line at $y=0$. The central square hole is centered at the origin with side length 2. The outer boundary is a rectangle with width $2L$ and height $2H$. The inner boundary of the hole is a square with side length 2. The domain is labeled with x and y axes, and the hole is labeled with x and y axes. The outer boundary is labeled with L and H . The inner boundary is labeled with 1. The domain is divided into four quadrants by a vertical line at $x=0$ and a horizontal line at $y=0$.
